

EMAIL

Enamelled stove pipes

- The EMAIL product range meets all possible interior configurations for connecting the stove to the flue. The stove tubes are enamelled in standard matt black for increased aesthetic value within the living room. This product range includes straight elements, elbows, tee-pipes and all necessary accessories such as caps, reductions, anchor plates etc.

- The EMAIL product range is suitable for solid and liquid combustion at high temperatures. Thanks to the easy male/female connection, the orientation of the tube can be easily adapted to the needs of your living room-configuration. Other RAL-colours or bright versions are available on request.
